

# SULTHAN RAFLI

## Full Stack Developer

msulthanraflim@gmail.com | +62 819-0815-0522 | Jakarta, Indonesia | [LinkedIn](#) | [Portfolio](#)

### PROFESSIONAL SUMMARY

---

Full Stack Developer with 6+ years of experience building and maintaining scalable web systems in the healthcare industry. Proficient in Angular, Node.js, and Go, with a strong track record of system migrations, microservices architecture, and cross-functional collaboration. Experienced in CI/CD pipelines, cloud infrastructure, and national healthcare system integrations (BPJS, SATUSEHAT). Known for mentoring junior developers, conducting code reviews, and maintaining high-quality standards across teams.

### PROFESSIONAL EXPERIENCE

---

#### PT Periksa Indonesia

Senior Full Stack Developer

2022 – Present  
Jakarta, Indonesia

##### Key Responsibilities:

- Designed and developed system modules including Financial, Logistics, Cashier, Nutrition, and Dynamic Form Builder to support operational workflows.
- Managed and maintained system infrastructure using Redis, Elasticsearch, RabbitMQ, and Docker to support scalable and reliable services.
- Developed and maintained BPJS Bridging integrations (Applicares, VClaim, Antrean Online, Mobile JKN, I-Care, Apotek Online, PCare).
- Contributed to SATUSEHAT integration to support national healthcare interoperability.
- Managed release and deployment processes using GitHub Releases and GitHub Actions across multiple services.
- Mentored and trained 10+ interns through code reviews and technical guidance.
- Participated as Internal Auditor for ISO 27001, focusing on physical security compliance.

##### Key Achievements:

- Led migration from monolithic Node.js (Express.js) to Golang microservices architecture (10+ services), significantly improving system scalability and maintainability.
- Achieved 98–99% uptime/success rate on all BPJS Bridging integrations.
- Improved overall code quality across the team through structured mentoring programs and standardized code review processes.

#### PT Periksa Indonesia

Junior Full Stack Developer

2019 – 2022  
Jakarta, Indonesia

##### Key Responsibilities:

- Built and maintained core system features using CodeIgniter 3 and Express.js.
- Participated in mobile application development using Ionic, extending system accessibility to mobile platforms.

- Created printable medical documents including forms, reports, and administrative outputs tailored to hospital needs.

#### Key Achievements:

- Led full system migration from CodeIgniter 3 to Angular, modernizing the application architecture and significantly improving maintainability.
- Enabled mobile platform support for the system by contributing to the Ionic-based mobile application.

## NOTABLE PROJECTS

---

For a full list of projects and live demos, visit my portfolio [here](#)

#### Selected highlights:

- YCAB Foundation – Corporate website for a leading non-profit organization.
- Calma Stories – Sustainable fashion platform enabling women to rent designer outfits.
- PUPR Doc Sign – Middleware bridging AutoCAD engineering workflows with BSR digital signature services.

## EDUCATION

---

#### Universitas Trilogi (d/h STEKPI)

*Bachelor of Technology (S1)*

Completed 2025  
Jakarta, Indonesia

#### CEP-CCIT FTUI

*Diploma of Technology (D3)*

Completed 2020  
Jakarta, Indonesia

## CERTIFICATIONS

---

Software Engineering – Java Technologies

*Certificate | DNIIT*

2021

Professional Certificate in Information Technology

*Certificate | CEP CCIT FTUI*

2020
