

Sulthan Rafli

Full Stack Developer

Tanya cu tuh?

- tampilkan pengalaman, capaian, skill, data yg aktual (nyata)
- harus pisah antara job desk & capaian & bagian experience
- Pisah antara hard skill & soft skill
- lebih baik pake cv format ATS. kalo format ATS ngga usah pake foto
- foto bisa di foto di foto foto

② About Me → isinya kurang lebih sama kayak linkedin

I am a ~~passionate~~ programmer and ~~very proficient~~ in my work. I have worked on many projects including a Web Application which deals with the integration of different devices into one system using an API. It was mainly based on server side programming where we developed multiple websites through ~~various~~ frameworks.

④ Professional Experience

~~PT Periksa Solusi Indonesia~~ → apa aja
Periksa.id | Senior Middle Stack Developer → senior / leader
2022 – Present → mending tulis full stack aja deh (?)

- Contributed to system architecture modernization by supporting migration from Node.js (Express.js) to Golang using a microservices architecture (**10+ services**), improving scalability and maintainability
- Managed and maintained system infrastructure using Redis (caching), Elasticsearch (search engine), RabbitMQ (message broker), and Docker (containerization) to support scalable and reliable services
- Developed and maintained BPJS Bridging (Applicares, VClaim, Antrean Online/Mobile JKN, I-Care, Apotek Online, PCare), achieving **98–99% success rate** ✓
- Contributed to SATUSEHAT integration to support interoperability with national healthcare systems ✓
- Managed release processes using GitHub Releases and GitHub Actions to ensure smooth and consistent deployment across multiple services ✓
- Developed system modules including Financial, Logistics, Cashier, Nutrition, and Dynamic Form Builder to support operational workflows ✓ lebih oke lagi kalo bisa kasih waktu brp lama develop-nya
- Mentored and trained **10+ interns**, including conducting code reviews and improving code quality across the team ✓
- Participated as an Internal Auditor for **ISO 27001**, focusing on physical security compliance ✓

~~Periksa.id~~ | Full Stack Developer junior / senior
2019 – 2022

- Built and maintained core system features using CodeIgniter 3 (CI3) and Express.js ✓
- Contributed to full system migration from CodeIgniter 3 to Angular, modernizing the application architecture and improving maintainability
- Participated in mobile application development using Ionic, extending system accessibility to mobile platforms
- Created printable medical documents (forms, reports, and administrative outputs) tailored to hospital needs ✓

⑦ Certificate → kasih link y/ akses sertifikat → atau bagian rni bisa di skip, di - ganti link portfo- folio

2021 (Software Engineering – Java Technologies)
Certificate | DNIIT

2020 Professional Certificate in Information
Technology Professional | CEP CCIT

⑥ Top Skill

- Angular
- Node.js
- Go

→ tambahkan soft skillnya
ganti ke developed / built
→ jangan pake link github banyak HRD yg ngga tau github
→ lebih baik buat portofolio trs cantumin linknya di sini

⑤ Top Projects

- Calma Stories
A sustainable fashion platform enabling women to rent designer outfits and clutches.
- PUPR Doc Sign
A robust middleware designed to bridge AutoCAD engineering workflows with BSR digital signature services
- YCAB Foundation
Built the corporate website for a leading non-profit organization.
- Rusun System
Rusun System is a web application for managing apartment.

③ Education Background

- Universitas Trilogi (d/h STEKPI) ✓
Bachelor of Technology
Completed in 2025
- CEP-CCIT FTUI ✓
Diploma of Technology
Completed in 2020
